

Families Needed for Research Study

Researchers at the University of Kentucky Markey Cancer Center are looking for families (mother, father and at least one child) willing to each donate a small blood sample. The samples will be used to develop a new genetic test that may help find more effective methods for cancer detection and treatment.

All families are welcome to participate. Any age, gender or state of health is fine. We are particularly interested in enrolling families with adult children.

For further information, please contact Andrew Pierce, Ph.D., at (859) 433-6775.
